An artificial, intelligence-based production scheduler
Alberto De Toni; Guido Nassimbeni; Stefano Tonchia
Integrated Manufacturing Systems  v7n3  PP: 17-25  1996
ISSN: 0957-6061  JRNL CODE: ING
WORD COUNT: 5767
```

...TEXT: each work centre in relation to each released customer order. So
the problem is how aggregations of customer orders can be made and
which customer orders aggregation must be released to satisfy the
different optimum lot sizes requested by the different work...

...final assembly stages.

The reasoning model is based on two fundamental steps:

1defining the customer **orders** aggregations ;

2scheduling the production **orders** at each work centre, in relation to the decision regarding the customer **orders** **aggregation** release.
The customer **orders** **aggregation**

The rules which start off the **aggregation** mechanism involve a search for customer **orders** with the same product-code and more or less similar due-dates (a **predetermined** maximum 1time interval exists). The **aggregation** of the customer **orders** must form production orders in each single work centre which are greater than the minimum...

...the work centres in simulation mode;

- calculation of the slack time for all the customer **orders** aggregations ;

- customer **orders** **aggregation** selection for the real release;

- resources allocation and production order releases (one for each work centre).

For each customer **orders** **aggregation** , a work centre loading is simulated as a consequence of the release of the customer **orders** of that **aggregation** , in the form of production **orders** at each work centre:
- Each customer **orders** **aggregation** in the portfolio induces a search in the storehouse for free units of finished products...

...the materials and a simulated loading of the work centres for the release of these **orders** .

For each customer **orders** **aggregation** , the slack time is calculated as the difference between the due-date and the throughput...

...to complete the orders in time and it constitutes a measure of delay. The customer **orders** **aggregation** with the lowest slack and respecting the production constraints have priority for release.

In Figure...

...at that centre: each centre is represented by its work load, derived from the customer **orders** aggregations already released (thus becoming production **orders** in each centre), plus the load due to the customer **orders** **aggregation** whose release has been simulated: the latter load is placed high as it is hypothesized...average.

When a rising step profile has been assured, the slack time for each customer **orders** **aggregation** can be easily calculated. The **aggregation** with the lowest slack have priority for release.

However, it may not be the order...

...for the management of urgent orders is provided. Managing a customer order (or a customer **orders** **aggregation**) defined as urgent and thus with processing priority over the others, even if they have...

...one per centre (in the situation illustrated in Figure 3, the numbers of the production **orders** refer to the respective customer **orders** aggregation).

This insertion could alter the rising steps relative to every order: in Figure 3 a...slack time (due-date minus total lead time) priority rule is applied to despatch the **orders** . Aggregation of **orders** is possible only by a human expert, after the despatching.

With the presented scheduler, on...

Abstract (Basic):
...   the auction has an auction close time; prioritizing the orders
    from the traders based on **predetermined** criteria after the auction

close time has occurred; matching the orders from the traders based at least in part on the...

...prioritization of the orders, where a portion of the orders is matched and a portion of the orders is unmatched; canceling the portion of the orders that are unmatched; determining the VWAP price based at least in part on the orders; and filling the portion of the orders that are matched based at least in part on the determined VWAP price.

   Orders monitoring method for equity market, involves monitoring
   amount of time between sending message to market participant and receipt
   of response message from...

Abstract (Basic):
...   is monitored. The amount of occasions that the market
   participant does not respond within a pre - specified amount of time
   is recorded.
...   b) a system for monitoring   orders .

...   actual customer comments, praised its "smooth ordering process and
great prices" and selection.
      Once an order is placed, it's up to Hanover Direct to deliver it.
      The warehouse has long stocked home furnishings, gifts and apparel
for eight of 13 Hanover Direct catalogs, which go by such names as Colonial

Garden Kitchens, Silhouettes and Gump's. Even though the catalogs recently were matched to Web sites and Internet orders are up four-fold, it wasn't until this holiday season that the facility received significant orders that originated on home or office computers, rather than by phone or mail.

Orders , regardless of their source, arrive in the warehouse as numbers on slips of paper. The numbers correspond to inventory rows marked like library aisles. At this time of year, the warehouse is packed nearly to its 40-foot ceiling with 90,000...

...   customer, even facilitating returns. PureEcommerce brings suppliers, merchants and customers closer together by sharing real- time information via a Web browser. Unlike the outsourced model, PureEcommerce gives the company control over...

...solutions involving legacy systems.
   "Internet customers want the type of personalized service that PureEcommerce can deliver ," said Rachel Lev, director of marketing for Yantra. "For example, if you order a toy train for your niece or nephew's birthday, you can see if the caboose is in stock and order a different car. If not; order a book on trains (which actually comes from a book distributor) and have it gift -wrapped to match the train; have the entire order delivered by the child's birthday; and request the lowest-cost shipping that will get the gifts there in time . Yantra's PureEcommerce is the only solution that can do all this, and it lets shoppers know where their order stands at any stage in the process."
   According to Forrester Research's August 1999 report...

  Detailed Description

Detailed Description
... vendors in parallel and then determines which of the responding offers
  to select. Once a gift has been accepted, system 100 asks the vendor to
  deliver the gift .

  The steps in this embodiment are summarized in FIG. 14. At step 1402,
  system 100 selects all gifts that need to be purchased, and arranges
  the gifts in a list.
  REPLACEMENT PAGE
  SUBSTITUTE SHEET (RULE 26)
  At step 1404, system 100 categorizes and aggregates identical gifts
  on the list.

  For example, if three different registries need three identical items,
  system 100 aggregates the individual registry items into a single
  order for three of the same item, with three different delivery zip
  codes. Step 1404 includes other steps, which are illustrated more fully
  in FIG. 7.

  At step 1406, system 100 selects one or more vendors to be contacted for
  each gift or aggregated gifts from the list. This is somewhat like
  a shotgun, where multiple request for offers are sent to many vendors at
  the same time . Step 1406 includes other steps, which are illustrated
  more fully in FIG. 15.

  At step...

Quad-State Business Journal (Winchester, VA, US), V10 N1 p14
PUBL DATE: 981100
WORD COUNT: 1,142
DATELINE: Hagerstown, MD, US, South Atlantic

TEXT:

...also competitive with the department stores, especially because we can get items in a shorter time ."

The wide selection may bring customers in, but Moller believes the service keeps them. Nineteen years of records, filling several card files, help gift -givers match patterns and avoid duplication. "Husbands really appreciate that." Individuals and area companies can order gifts by phone. If the recipient isn't on record, Moller and her four assistants will select an appropriate gift , wrap it and deliver or mail it.

Biology helps Moller's customer base grow. "Brides and their attendants come...

TEXT:

...the two weeks after Thanksgiving, but even then, it guarantees an exact weight and arrival date for each bird. At times, said Mr. Greenberg's mother Joyce, that has meant sending...

...parties and meals. Mrs. Greenberg said she has personally arranged rendezvous at interstate exits to deliver birds to harried customers, and Mr. Greenberg almost drove a truckload of birds to Atlanta a few years ago when a large order was temporarily misplaced by UPS.

Each bird is shipped with personal gift cards, and the company routinely encloses special items from purchasers. Mr. Greenberg said that means the shipping line must be stopped while workers match a personal note or business card with just the right turkey -- no small feat at...

... reason to keep buying from the antiquated methods that exist'' such as
FTD or 800- FLOWERS , which send orders through local florists .

        Calyx & Corolla has a long way to go, however, to match the sales of
industry leader 800- FLOWERS . The Westbury, N.Y., company sells and
 delivers more than $100 million worth of flowers and related gifts a
year.

        ``Calyx & Corolla is not really a competitor because you can't get
same-day or Sunday delivery and you don't get the personal touch of a
floral designer on the flowers you send,'' said Peter Spina, vice
president of marketing.

        He added that Calyx & Corolla does...
... for his own company because the media exposure will help expand the
overall market for delivered flowers.

        George Cain, president of Capital Cities Capital, would not say
precisely how much media time the flower company would receive. But ``the
investment is large enough to provide an effective...

 MAIL-ORDER FOOD. TEST. The food is in the mail (Take away the bows,boxes,
and baskets, and how does that gift of food taste?)
 Consumer Reports: vol. 61, no. 11, pp. 12-17, November, 1996

        ... get much more convenient than this: You dial a number (often
toll-free), place your order , and voila: Sour cherry preserves from
Michigan, cheddar cheese from Vermont, oranges and grapefruit from Florida,
or smoked salmon from Washington are delivered anywhere in the country.
Last year, 6.4 million Americans ordered food by mail, much of it for
friends and relatives at holiday time .

        It's no wonder food is such a popular gift - you don't have to worry
that it won't fit your brother or match your Mom's decor. But as with any
mail- order product, there are risks. You can't poke at what you're
buying, or sniff it; instead, you have to rely on the flowery language
and flattering photographs typical of catalogs. And if the food is a gift
, you may never discover that it looked or tasted less than perfect. A
friend or...

... e-mail. You'll soon be sleeping soundly knowing that your gift will
arrive on time ."

  Corporate Gift-Giving

  Amazon.com gift certificates also provide corporations with an easy,
personalized way to thank or reward employees, vendors and clients during

the holidays. Through a special, limited- time offer, Amazon.com will process multiple gift certificate orders for 10 or more recipients. Companies can choose from paper or email certificates and have them delivered with a customized gift message to each individual. All corporate orders for multiple gift certificates must be placed by December 24th.

With a catalog of 2.5 million titles to choose from, gift certificate recipients can find books that exactly match their personalities and passions. "When you know there's someone on your fist who loves books, but you don't know what they've currently got on their nightstand, our gift certificates give them the freedom to choose what they want," said Bezos.

The Amazon.com Gift Center features thousands of book recommendations and personalized gift - matching services for grownups and kids alike. In addition, customers also can choose from thousands of...

Detailed Description
...  the GSU-enabled network computing device is
  Page  15 of 238
  physically present at a **predetermined** location over a particular **time**
  interval.

Another object of the present invention is to provide such an
Internet-based method...

...stampincy tracking server when the
GSU-enabled network computing device is present outside of the
predetermined location, or predetermined time interval, so that the
TS-stamping tracking server can track to the exact location of...

...instructions only when the GSU
enabled device is present within specific location over a particular
time interval (i.e. intersects a prespecified region along the space-
time continuum.

Another object of the present invention is to provide a novel
Internet-based method...GSU
chip, achieved when the GSU-enabled network computing device is
physically present at a predetermined location over a particular time
interval;
Fig. 24B is a schematic representation of an exemplary locus of timespace
coordinates collected...

...network computing device is present outside of the predetermined
Page 34 of 238
location, or predetermined time interval, so that the TS-stamping
tracking server can track to the exact location of...

...enabled device is
Page 35 of 238
present within a specific location over a particular time interval
(i.e.

intersects a prespecified region along the space- time continuum);
Ficr. 27B is a schematic representation of an exemplary locus of
timespace coordinates collected...

Claim
... space stamp upon the arrival of the GSU at a specific
location, or at a predetermined time . In accordance with the
principles of
the present invention, a time/space stamp generated by m e
predetermined time before, the desired display time , the GSU 175
decrypts the image to be displayed and downloads the decrypted image back
...sell securities. Depending on the level of service they have
purchased,
the quotes will be delivered with some predetermined delay (ranging
from
it real- time " to twenty minutes or so). Prior art real-time trading or
auctioning systems do not...exchange) computers that provide the
price quotes and process orders to trade (e.g. execute orders by
matching
offers to buy with offers to sell). This server 45 collects requested
information and translates...

...such order
messages to order execution subsystems (e.g. electronic communication
networks ECNs) over which orders to buy a particular security are
matched
with orders to sell the particular security, as oftentimes occurs when
a
market begins to lose value...the system of the present invention,
such orders are fairly and securely executed (i.e. matched with
corresponding unfilled orders in the marketplace) in accordance with
conventional time-prioritized procedures and practices of the market...
Blocks C and D until the auction server no longer receives any bids for a
predetermined amount of time (e.g. x seconds).
As indicated at Block H in FIG. 9EI, the auction server...

...t4
As indicated at Block I in FIG. 9E2, the auction server waits a second
predetermined time period (i.e. y seconds) for a new bid from any
client

machine participating in the...This is achieved when the GSU-enabled
network
computing device is physically present at a **predetermined** location over
a
particular time interval. AWeb-based owner/device registration server
1003' is provided for registering owners (or custodians...
...server 1001' when the GSU-enabled network computing
device 160' is present outside of the **predetermined** location, or
**predetermined** time interval, so that the TS-stamping tracking server
can
track to the exact location of...only when the GSU-enabled device 160' is
present within
specific location over a particular time interval (i.e. intersects a
prespecified
region along the space- time continuum). A Web-based GSU-enabled client
computing device/owner registration server 1003' is provided...buffered
in data storage aboard the GSU-enabled client device an d
downloaded at a **predetermined** time to the tracking server, or other
computer for processing and eventual display.
While a wireless...server sends an encrypted request to said
client machine to perform an action at a **predetermined** event time ,
said
encrypted request containing encrypted action data;
said encrypted request is then loaded into said GSUfor decryption at
said **predetermined** event time ;
at some **predetermined** time before said **predetermined** event time ,
said GSUdecrypts the encrypted action data and downloads the decrypted
action data back onto said...
...preventing access by said client machine or its operator to the
action data before said **predetermined** event time .
Page 204 of 238
data contained in said encrypted request, and the performance of said...
said encrypted bid
information for substantially simultaneous display on each said client
machine at a **predetermined** globally-referenced start- time .
232. The Internet-based method of claim 231, which further comprises:
(b) ascertaining at each...

...bid information with said locally-referenced start-time.
Page 207 of 238
(d) at said **predetermined** globally-referenced start- time , said
auction
server starts the bidding process for the item to be auctioned, by
enabling...

...auction server no longer receives any bids from any competing client
machines for a first **predetermined** amount of time (e.g. x seconds);
and
0) said auction server sending all competing client machines a...
...based method of claim 239, which further comprises:
(k) said auction server waiting a second **predetermined** time **period**
(i.e. y seconds) for a new bid from any client machine competing in the
...said encrypted bid
information. for substantially simultaneous display on each said client
machine at a **predetermined** globally-referenced start- time . 247. The
Internet-based system of claim 246, wherein said computer
administrated auction process further...

...system of claim 248, wherein said computer
administrated auction process further comprises:
(d) at said **predetermined** globally-referenced start- time , said
auction
server starts the bidding process for the item to be auctioned, by
enabling...

...auction server no longer receives any bids from any competing client
machines for a first **predetermined** amount of time (e.g. x seconds);
and
0) said auction server sending all competing client machines a...

...wherein said computer
administrated auction process further comprises:

(k) said auction server waiting a second **predetermined** **time** **period** (i.e. y seconds) for a new bid from any client machine competing in the
...

...offer to trade information for substantially
simultaneous display on each said client machine at a **predetermined** globally-referenced start- time .
261. The Internet-based method of claim 260, which further comprises:
(b) ascertaining at each...time.
263. The Internet-based method of claim 262, which further comprises:
(d) at said **predetermined** globally-referenced start- time , said trading
server starts the trading process for the property being offered for trading,
by...

...offer to trade information for substantially
simultaneous display on each said client machine at a **predetermined** globally-referenced start- time . 273. The Internet-based system of claim 272, wherein said computer
administrated trading process further...
